

PoliPrint®

Polyester Synthetic Paper

POLYESTER SYNTHETIC PAPER FOR OFFSET AND HP INDIGO PRINTING

Now you can enjoy the robust strength of a synthetic paper without the need for your press crew to master complicated synthetic printing techniques. **PoliPrint®** is a heavy-duty synthetic paper that's designed to be ultra-fast drying with conventional offset inks. It's tough enough to handle abusive indoor and outdoor applications without sacrificing quality, style or production time. Use PoliPrint just like an uncoated stock on all traditional offset or HP Indigo presses. It's also available for pressure sensitive applications, allowing easy installation of removable self-adhesive graphics, indoors or out.

Produce beautiful results that are waterproof, tear-proof, and resistant to weather and chemicals. No special inks and no extra coatings required. We've made it that simple.

APPLICATIONS

- Indoor and outdoor signage
- Brochures
- Identification cards
- Magazine covers
- POP displays
- Instruction manuals
- Service manuals
- Parking decals
- Menus
- Maps
- Removable labels
