

PoliPrint®

Polyester Synthetic Paper

POLYESTER SYNTHETIC PAPER FOR XEROGRAPHIC DIGITAL PRINTING

PoliPrint® is an impressively strong polyester synthetic paper ideal for high heat, dry toner digital printing. PoliPrint is an economical alternative to traditional lamination, eliminating the excess time and waste involved, and delivering a more permanent product. Toner fuses with PoliPrint to create an extremely durable finished product that's resistant to water, grease and other contaminants. This robust solution is suited for most environmental conditions and has powerful tear resistance.

PoliPrint provides excellent printability for the high quality look and feel of a luxury paper. Trust PoliPrint to deliver impressive results for your most demanding digital print projects.

APPLICATIONS

- Menus
- Luggage tags
- ID cards
